

Magi-Plug bath water overflow prevention from Byretech

**Prevents your bath from overflowing,
Plus changes colour
when bath temp
exceeds 36C.**

MAGIPLUG

WHITE

General Information.

Magi-Plug is a bath plug replacement that is pressure activated, so as when your bath water reaches a certain depth the Magi-Plug activates and lets the water out.

Magi-Plug can be attached to your normal existing plug chain if desired.

When in place, it changes colour once the water temperature reaches 36 Degrees Celsius.

Note. Magi Plug is not suitable for baths less than 15 inches (38cm) deep due to pressure settings in the plug. Byretech accept no responsibility what so ever for the improper use of this product.

Byretech Ltd

The Bathroom Water Damage Prevention specialists

We recommend that you make a test with this plug before leaving it to auto empty your bath tub.
